THREE-WAY CUTTING GATES

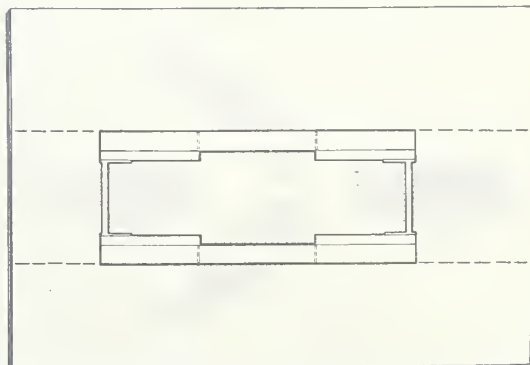

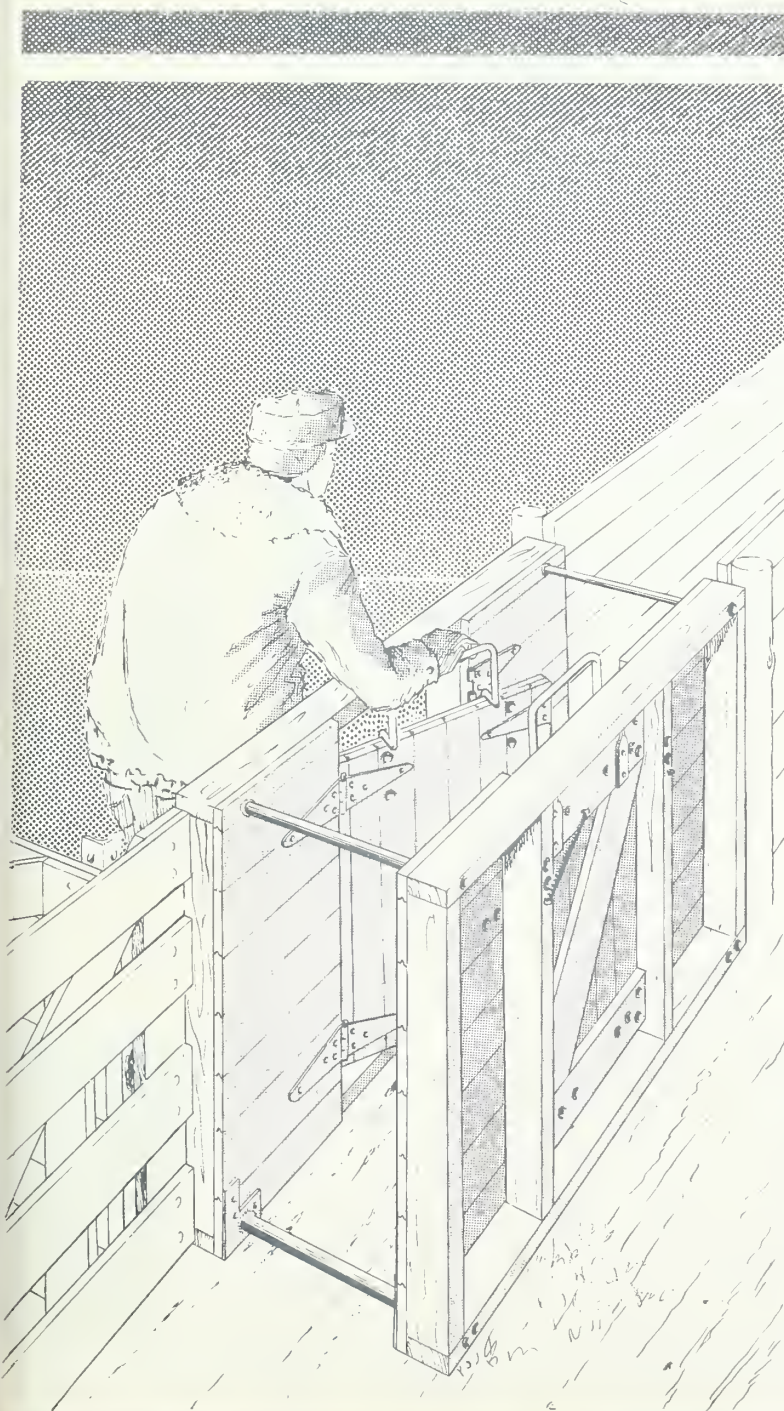

... for sheep

This is a portable chute without a floor. The side panels are held 19 inches apart by pipe spacers. Removable hinge pins permit the gates to pivot at either edge, and make it possible to separate sheep moving in either direction.

Complete working drawings may be obtained through your county agent or from the Extension agricultural engineer at most State agricultural colleges. There is usually a small charge.

ORDER PLAN NO. 5859 THREE-WAY CUTTING GATES FOR SHEEP

If working drawings of this plan are not available in your State, write to the U.S. Department of Agriculture, Agricultural Engineering Research Division, Plant Industry Station, Beltsville, Md. The U.S. Department of Agriculture does not distribute drawings, but will direct you to a State that does distribute them.
